

Leanworx®
Works like magic

35%

Increase in production

70%

Reduction in machine downtime

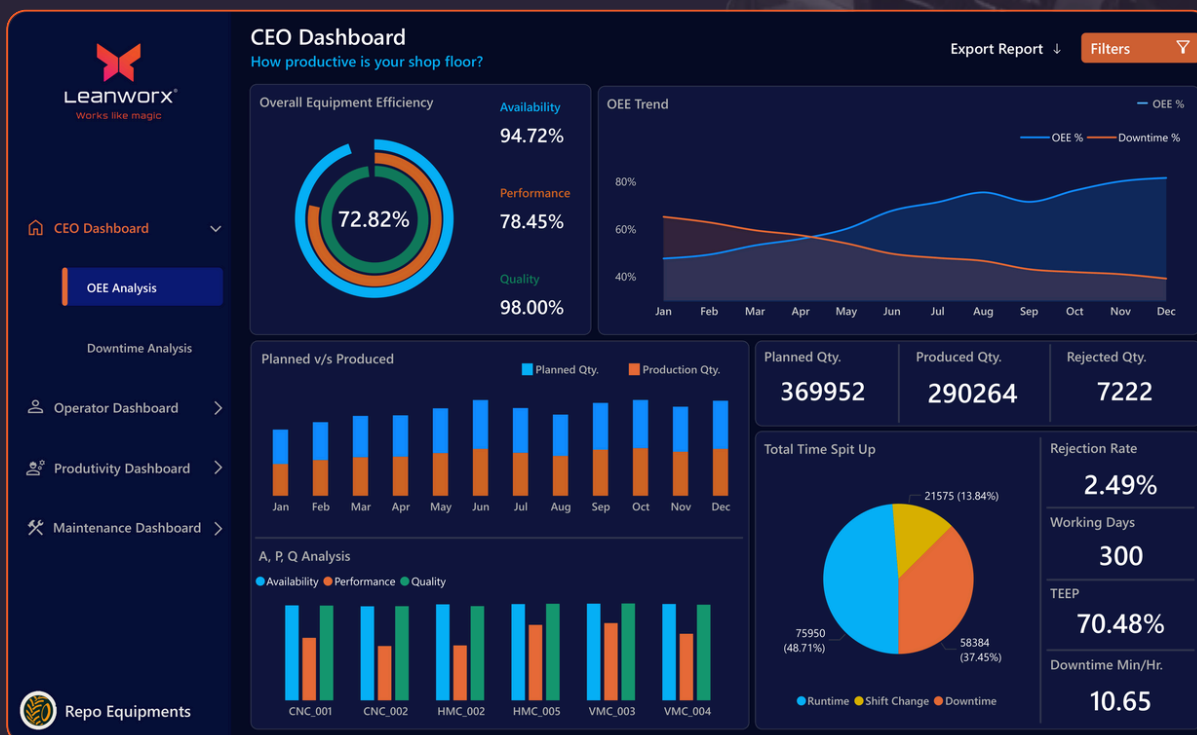

30%

Boost OEE in 2 weeks

40%

Reduction in operator attrition

DISCOVER HIDDEN PROFITS

Track revenue generating machines & operators

Increase output without buying more machines

See production clearly in real time

Stop unexpected machine stoppages

Spot bottlenecks before they hurt output production

Never miss your delivery commitments

Make shop floor operations system driven

Delegate without worries, Bring accountability

About Company

Leanworx is a Bangalore-based deep-tech company, established in 2017, is focused on improving productivity in manufacturing industries. It delivers live machine data from the shop floor, helping CXOs in manufacturing clearly understand what is happening in production. The company has a core team of 30 engineers who combine strong product engineering with deep knowledge of machine-shop practices.

About Product

Leanworx is a cloud-based Software-as-a-Service (SaaS) product built on Industrial Internet of Things technology, works like a productivity "Fit-Bit" health tracker for production machines. An industrial grade IoT device connects to any machine and captures live data automatically, which is sent securely to the Leanworx cloud, analysed, and presented as clear dashboards, reports, and alerts for the right people at the right time. Leanworx is installed and supported remotely and requires no local IT infrastructure or Internet in shop floor

Manufacturing DNA

Leanworx manufacturing DNA forged on shop floors. Built by people who have lived machine downtime and operator challenges, it cuts jargon, delivers practical insights, and helps CXOs enforce best shop floor practices that unlock hidden capacity every hour.

Key differentiators

Quick deployment, Easy to scale

Track any discrete machine

No IT infra & Internet required

Modular software, SaaS pricing

Fully managed software and IIoT

Cost less than a coffee

Who can benefit

Manufacturing companies with 5 to 500 machines, using machines for making precision mass produced parts, die cast parts, moulded parts, sheet metal parts, springs or fasteners. Industries such as auto parts, motors aerospace, defence, pumps, farm equipment, earth moving machinery, packaging, plastics, and food production can greatly benefit from Leanworx.

Founding Team

The Leanworx leadership team brings a combined 90 years of hands on manufacturing shop floor experience. Each founder contributes critical skills in software product development application engineering and sales and marketing. Together these strengths enable us to build practical products designed specifically for manufacturing.
